

**Radio Interlink  
Patress for the  
FHB10W and  
the FHH10W**

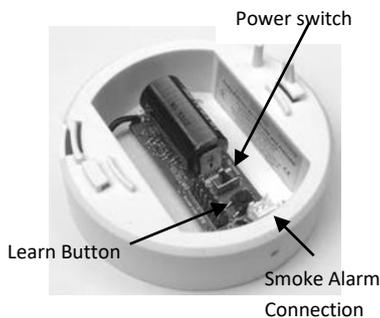

**Description and Operation**

This Radio Patress comes packed with the **FHB10W** smoke alarms and the **FHH10W**. It allows the fire alarm to talk to other alarms in a system and the **FH700HIA** Deaf Alert System when they are learned into a family.

**Features**

- Allows Radio-linking to Firehawk battery powered smoke and heat alarms for early warning of a developing fire. It is supplied as standard with the alarms for the **FH700HIA** Deaf Alert System.
- **SuperSafe** Radio Technology to enable fast and easy pairing and installation.

**Pre-Installation and Location**

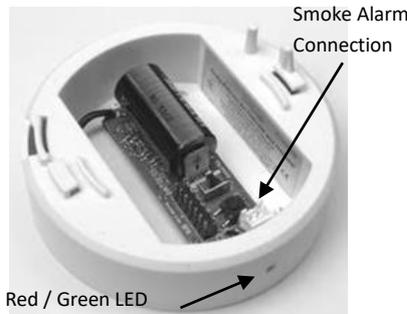

- 1) Turn on the power switch.
- 2) Choose the location of the alarm in accordance with the instructions and guidance in it's separate handbook and move to that location. Do NOT permanently fit to the chosen mounting surface until all parts of the system have been paired and tested to ensure there are no obstructions to the radio link.
- 3) Install all other Radio Pattresses in the same way.

**Teaching the System**

- 1) Press the Learn Button on the Alarm radio patress circuit board and all other devices you wish to be connected together by radio.
- 2) Wait for the red/green LEDs on all Radio Pattresses to stop flashing fast and

start flashing green every minute. This will take approximately four minutes. All units are now paired.

**NOTE: If either the learning or testing processes fail, power the system down by turning off the power switch on the Radio Patress circuit board, turn back on after five seconds and try re-learning the system as in 1 above. If it still fails call the helpline on 0800 008 6568.**

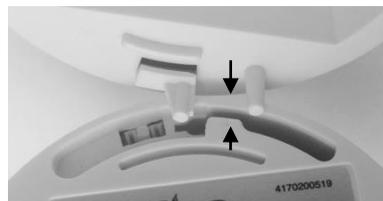

**Installation**

3) Permanently attach the radio bases to the chosen location and connect the wire from each alarm to the alarm connection as shown below.

4) Fit all alarms to their own Radio Pattresses by lining up the two arrows as shown below—

5) Close the alarm onto the Radio Patress and turn the alarm clockwise to lock it into place. This action automatically turns the alarm on.

**Testing the System**

Press the test button on each alarm and wait for the other alarms to sound before testing all other alarms in the same way. Allow at least 10 seconds after a successful test before testing the next one.

The **Radio Interlinked System** is now ready for use.

NOTE: If either the learning or testing processes fail, power the system down by turning off the power switch on the Radio Patress circuit board, then back on after five seconds and try re-learning the system as in 1 above. If it still fails call the helpline on 0800 008 6568.

Do not change any components of the system for those made by other manufacturers. Up to 14 fire alarms may be paired to the system.

**Warranty**

FireHawk guarantees to you, as a purchaser, that the enclosed Radio Patress will be free from defects in material, workmanship or design under normal use and service for a period of 10 years. This Guarantee is not assignable. Our liability to you, under this guarantee is limited to repairing or replacing any part which we find to be defective in material, workmanship or design, free of charge to the customer, upon sending the product with proof of date of purchase, postage paid to FireHawk, Units 15/17 Manford Industrial Estate, Manor Road, Erith, Kent DA8 2AJ UK. The terms of this guarantee will not apply in the following circumstances: If the product has been modified, dismantled, contaminated, damaged, neglected or otherwise abused or altered following the date of purchase, or if it fails to operate due to incorrect siting, installation, maintenance, inadequate or over voltage electrical power, or damage caused by failure to abide by the instructions supplied no claim under the guarantee will be entertained. The liability of FireHawk arising from the sale of this product or under the terms of this guarantee shall not in any case exceed the cost of replacement of the product. In no case, shall FireHawk be liable for consequential loss or damage resulting from the failure of the device or the breach of this or any other guarantee, express or implied or for damage caused by failure to abide by the instructions supplied. This guarantee does not affect your statutory rights.
